The Case of the Missing Question Answer Key

1. What clues can you find about the missing prompt?

Sample Answer:

- The response gives advice and uses a friendly, motivational tone.

- It's directed toward a student ("in school," "your backpack").

- It focuses on habits and organization tips, not grades or studying.

- The voice sounds encouraging, like a teacher, counselor, or coach.

Inference: The original prompt probably asked ChatGPT for *helpful tips* or *advice* for *students* about staying organized.

2. What do you think the original prompt might have been?

Sample Answer: "ChatGPT, how can I stay organized in school?"
or
"Give me some easy tips for staying organized as a student."

Explanation: The answer is short, practical, and student-focused, which suggests the original prompt was general and open-ended.

3. Rewrite your prompt to make it more powerful or specific.

Improved Prompt Example: "ChatGPT, act as a school success coach. Give 3 practical, easy-to-follow tips for staying organized as a middle school student, using a friendly and encouraging tone."

Why is it better:

- Defines ChatGPT's *role* ("school success coach")

- Identifies the *audience* ("middle school student")

- Clarifies the *tone* ("friendly and encouraging")

- Sets a *structure* ("3 practical tips")

4. Explain your reasoning.

Sample Explanation:
This improved prompt would likely produce a more focused and relatable answer. By naming the audience and tone, it prevents ChatGPT from being too formal or generic. Adding a role ("school success coach") gives the AI a voice and perspective, making the response feel more personal and motivating.
