## The Emotional Rollercoaster of AI

Every ChatGPT prompt carries emotional DNA - a vibe that shapes how the AI "speaks." Some prompts whisper politely, others shout like motivational posters, and a few might sound like your most dramatic friend texting at midnight. Your mission: become a **Tone Decoder** and analyze how the *mood* of the prompt influences the *mood of the output*. Read each prompt below, decide what emotional tone or personality it carries (persuasive, funny, formal, empathetic, dramatic, serious, etc.), and describe what kind of *emotional feel* the resulting ChatGPT response would likely have. In short: if the AI were a person, what would their *attitude* be when answering this?

**Prompt #1: Persuasion Mode** - "Write a short paragraph convincing students that cleaning up after lunch helps the whole school community."

**Predicted Emotional Feel of the Output:** → \_\_\_\_\_

**Tone Words That Fit:** (e.g., confident, encouraging, logical, serious)

→ \_\_\_\_\_

**Why You Think So:** → \_\_\_\_\_

**Prompt #2: Comedy Mode** - "Explain the importance of doing homework - but make it sound like a stand-up comedy routine."

**Predicted Emotional Feel of the Output:** → \_\_\_\_\_

**Tone Words That Fit:** (e.g., playful, exaggerated, sarcastic, witty)

→ \_\_\_\_\_

**Why You Think So:** → \_\_\_\_\_

**Prompt #3: Formal Mode** - "Compose a professional email to a company CEO requesting permission to interview them for a school project."

**Predicted Emotional Feel of the Output:** → \_\_\_\_\_

**Tone Words That Fit:** (e.g., playful, exaggerated, sarcastic, witty)

→ \_\_\_\_\_

**Why You Think So:** → \_\_\_\_\_
