

Name _____

Major UK Industries

Directions: Read the short descriptions of major UK industries. Then answer the questions that follow each section.

Finance: London is known as one of the strongest financial centers in the world. Banks, insurance companies, and investment firms help manage money for people and businesses. The industry attracts workers from many countries and supports global trade across Europe and beyond.

Technology: Cities like Manchester, Cambridge, and London are home to fast growing technology sectors. Companies focus on software design, artificial intelligence, digital security, and new inventions. This industry grows quickly and creates jobs for skilled problem solvers.

Tourism: Millions of visitors travel to the United Kingdom every year. They come to explore historic castles, famous museums, landmarks like Big Ben, and beautiful countryside areas. Tourism brings money into local communities and helps support shops, hotels, and transportation services.

Manufacturing: The UK creates a wide range of products including cars, machinery, medical equipment, and specialty foods. Factories are found in many regions and rely on skilled workers. Manufacturing helps build items for both domestic use and international export.

1. Why is the finance industry important to the UK economy?
