## Geo Fact Check Answer Key

- |          |           |
|----------|-----------|
| 1. True  | 6. True   |
| 2. False | 7. True   |
| 3. True  | 8. True   |
| 4. True  | 9. True   |
| 5. False | 10. False |

### Teacher's Guide

- Introduce or review the terms region, landmark, climate, and landform.
- Read the statements aloud once for students who benefit from audio support.
- Model how to look for clue words such as flat plains, islands, or cold winters.

### Differentiation Tips

- Provide a United States map to help students check locations.
- Allow struggling learners to work with a partner.
- Challenge advanced students to correct each false statement by rewriting it accurately.

### Engagement Ideas

- After students complete the worksheet, read each statement and have the class vote True or False with hand signals.
- Invite students to create one True and one False statement about their favorite state.

### Extension Activities

- Have students research a U.S. landmark and write three new facts to share.
- Assign students to create a short quiz of five True or False questions for a partner.
