

answers

Uppercase Letter Tracing

Instructions In each row, first trace the capital letters by following the dots. As you move down the row, the dots will disappear, so write the letter yourself in the empty spaces, practicing more and more!

Four rows of handwriting practice lines. Each row consists of three horizontal red lines (top, middle, bottom) and is divided into five slanted rectangular boxes by diagonal red lines. The first row contains dashed uppercase 'Z' letters for tracing. The subsequent three rows contain empty boxes for independent practice.
