## Planetary Volcano Sort

**Directions:** Volcanoes aren't only on Earth! Other planets and moons also have amazing volcanic features. Below are eight famous volcanoes. Place each volcano into the correct column for the planet or moon it belongs to.

- Mount St. Helens
- Mauna Loa
- Olympus Mons
- Arsia Mons
- Maat Mons
- Sapas Mons
- Loki Patera
- Pele

Earth	Mars	Venus	Io (Moon of Jupiter)

**Critical Thinking Bonus:** Which of these worlds (Earth, Mars, Venus, or Io) do you think would be the most dangerous to explore for volcanologists, and why?
