## Volcanoes Fill-In Exercise Answer Key

1. magma
2. lava
3. crater
4. vent
5. ash
6. eruption
7. fissure
8. pyroclastic flow

### Challenge Question (Sample Answer):

Scientists use precise volcanic vocabulary so they can describe and predict hazards clearly. Understanding terms like "ash" or "pyroclastic flow" helps communicate risks to the public quickly and accurately, which can save lives during volcanic events.
