

Name \_\_\_\_\_

## Climate Zone Classifier

Below are descriptions of different regions around the world. Write **Tropical**, **Temperate**, or **Polar** in the blank before each one.

1. \_\_\_\_\_ This rainforest in the Amazon basin gets heavy rain year-round and stays warm even in "winter."
2. \_\_\_\_\_ Greenland's interior is covered in ice, with temperatures rarely going above freezing.
3. \_\_\_\_\_ Southern France experiences warm summers, cool winters, and four distinct seasons.
4. \_\_\_\_\_ The Caribbean islands have lush vegetation, warm seas, and almost no winter.
5. \_\_\_\_\_ Antarctica's landscape is frozen year-round, with some of the coldest temperatures on Earth.
6. \_\_\_\_\_ New Zealand's North Island has mild winters, warm summers, and a variety of plant life.
7. \_\_\_\_\_ Central Africa stays hot all year, with heavy seasonal rains that feed dense jungles.
8. \_\_\_\_\_ Alaska's northern coast is snow-covered for most of the year and has very short summers.
9. \_\_\_\_\_ Japan has warm summers, snowy winters in the north, and colorful autumn foliage.
10. \_\_\_\_\_ Indonesia's climate is humid, warm, and perfect for growing tropical fruits year-round.

### Climate Clues Challenge

Circle the **two clues** in each sentence that helped you decide the correct climate zone. Example: "hot all year" or "covered in ice."
