## Erosion Action Sort: Stop, Slow, Ignore Answer Key

1. **P** - Plants stabilize soil and prevent erosion.
2. **N** - Bare soil in rain encourages erosion.
3. **C** - Retaining walls reduce ongoing slope erosion.
4. **C** - Silt fences trap sediment during construction.
5. **N** - Removing vegetation increases erosion risk.
6. **N** - Poor farming method encourages erosion.
7. **P** - Mulch protects soil from rain impact and wind.
8. **C** - Terraces slow water flow and reduce erosion.
9. **P** - Staying on trails prevents disturbing soil in new areas.
10. **N** - Poor paving without drainage can cause more erosion.
