

Name _____

True or False Erosion Quiz

Instructions: Below are statements about erosion processes. Some are **true facts**, while others are **common misconceptions**. Write **T** for True or **F** for False in the blank next to each statement. After answering, **rewrite the false statements so they are correct**. This will help you understand the truth about how erosion works.

1. ___ Erosion only happens when wind blows dust across the desert.
2. ___ Water, wind, ice, and gravity can all cause erosion.
3. ___ Erosion and weathering are exactly the same process.
4. ___ Glaciers can carry rocks for miles and drop them in new locations.
5. ___ Erosion can shape valleys, cliffs, and beaches over long periods of time.
6. ___ Plant roots help speed up erosion by loosening soil.
7. ___ Human activities, like deforestation, can make erosion happen faster.
8. ___ Erosion is always harmful and never creates useful landforms.
9. ___ Rivers can erode rock and carry sediment downstream.
10. ___ Erosion stops completely once rocks are broken into smaller pieces.

Rewrite the false statements in chronological order below:
