## True or False Erosion Quiz Answer Key

1. F – Erosion can happen in many environments, not just deserts.
2. T
3. F – Weathering breaks down rock, erosion moves it.
4. T
5. T
6. T – Roots loosen soil, making it easier to be carried away.
7. T
8. F – Erosion can create fertile river valleys, beaches, and scenic landscapes.
9. T
10. F – Erosion continues to move smaller particles.

### Corrected False Statements:

1. Erosion happens in deserts, rivers, coasts, mountains, and many other environments.
2. Weathering breaks down rocks, while erosion transports the pieces.
3. Erosion can create both harmful effects (loss of farmland) and beneficial landforms (river deltas).
4. Erosion can still move sand, silt, and clay even after rocks are broken down.
