## Sorting Data vs. Learning Patterns Answer Key

1. Data Processing – Ordering grades is following a rule.
2. AI Prediction – Suggesting songs uses learned patterns.
3. Data Processing – Adding prices is simple calculation.
4. AI Prediction – Recommending jackets is based on shopping patterns.
5. Data Processing – Listing books is rule-based sorting.
6. AI Prediction – Suggesting movies based on viewing history is pattern learning.
7. Data Processing – Counting absences is basic number tracking.
8. AI Prediction – Predicting fatigue uses learned data patterns.
9. Data Processing – Listing train times is rule-based.
10. AI Prediction – Predicting traffic uses learned historical patterns.
