Name _____

Prompt Dissection: What Makes a Strong Prompt?

When you give instructions to AI, the way you **build your prompt** determines how helpful the answer will be. Strong prompts usually include several key elements:

Task: What do you want the AI to do? (Explain, compare, list, write a story, etc.)

Context: Background information or details that focus the response.

Format: The type of response you want (essay, list, article, story, dialogue, etc.).

Constraints: Boundaries such as length, number of examples, or reading level.

Audience: Who the writing should be aimed at (kids, teens, adults, experts, general readers, etc.).

Instructions - Read each prompt carefully. **Underline or label** the parts of the prompt that show the **Task, Context, Format, Constraints, and Audience**. After marking, answer the reflection questions.

Prompt 1 - "Write a 3-paragraph article that explains how recycling helps the environment. Use simple language so that elementary school students can understand it, and include at least two real-life examples."

Task: _____

Context: _____

Format: _____

Constraints: _____

Audience: _____

Prompt 2 - "Create a dialogue between two astronauts who are preparing for their first mission to Mars. The conversation should include at least three scientific challenges they might face, and it should be written in a way that would be entertaining for a middle school science class."

Task: _____

Context: _____

Format: _____

Constraints: _____

Audience: _____
