Name _____

Constraint Builder: Make It Precise

Instructions - Each "Before" prompt is too basic. Rewrite it by adding **3–4 constraints** that tell the AI exactly how to respond. You can use constraints such as:

Length (e.g., 2 paragraphs, 500 words, one page)

Tone (e.g., funny, serious, persuasive, simple)

Style (e.g., poem, article, story, dialogue)

Perspective (e.g., from a teacher, from a dog's point of view, from a scientist)

1.Before: Write about animals.

After (Your Rewrite):

2. Before: Explain the weather.

After (Your Rewrite):

3. Before: Write about food.

After (Your Rewrite):

4. Before: Tell me about technology.

After (Your Rewrite):

5. Before: Write a story.

After (Your Rewrite):

Reflection Questions

1. Which constraints did you find easiest to add? Which were hardest?

2. How did adding constraints change the way your "After" prompt would guide the AI's response?

3. Which of your rewrites do you think would give the most interesting answer, and why?
