Learning to Write Strong AI Prompts

When you talk to an AI, the quality of your prompt (your question or instruction) shapes the answer you receive. A **weak prompt** is often vague, too broad, or doesn't give enough direction. This usually results in a short, unhelpful, or generic answer. A **strong prompt**, on the other hand, is clear, specific, and includes enough detail so the AI knows exactly what you want. Strong prompts lead to responses that are more useful, accurate, and well-structured.

How to Strengthen a Prompt

Ask yourself these questions:

1. **Topic:** What do I want the AI to focus on?
2. **Task:** What should the AI do-explain, compare, list, write a story, etc.?
3. **Format:** Do I want an essay, a list, a script, a dialogue, or something else?
4. **Audience:** Who is this for-kids, teachers, scientists, or the general public?
5. **Details:** What should be included or avoided?

Below are weak prompts. Your job is to rewrite them into strong prompts. Remember: be specific, clear, and thoughtful.

1. **Weak Prompt:** Tell me about cats.

Your Strong Prompt: _____

2. **Weak Prompt:** Explain technology.

Your Strong Prompt: _____

3. **Weak Prompt:** Write a story.

Your Strong Prompt: _____

4. **Weak Prompt:** Teach me math.

Your Strong Prompt: _____

5. **Weak Prompt:** Explain food.

Your Strong Prompt: _____

6. **Weak Prompt:** Tell me about music.

Your Strong Prompt: _____
