Teacher's Guide

- This activity helps K-1 students quickly recognize **final consonant blends**, especially the -lt blend, in short word lists.
- Read the words aloud first for emerging readers or allow students to whisper-read before circling.
- Provide a highlighter instead of a pencil for students who need more visual support when identifying patterns.
- For extension, have students choose two -lt words from the rows and say a sentence aloud using each word, or sort the circled words into real items and describing words.
