Teacher's Guide

- This worksheet strengthens recognition of **final -mp blends** while building early vowel awareness.

- Review the short vowel sounds before starting and say each incomplete word aloud to help students predict the correct vowel.

- Provide scaffolds such as vowel tiles or having students tap out each phoneme to hear the missing middle sound.

- For extension, ask students to choose one completed word and draw a matching picture, or challenge advanced students to think of another -mp word not listed and write it independently.
